

Grade 4 Science Worksheet:1 (DifficultyLevel: Difficult)

Name: _____

Date: _____

Section A: Fill in the Blanks

1. Animals like lions use their _____ teeth and strong jaws to crush bones.
 2. A woodpecker's _____ helps it drill into trees to find insects.
 3. The _____ of snakes allows them to swallow prey larger than their heads.
 4. Herbivores like cows have _____ teeth to chew tough plants.
 5. The hummingbird's _____ is long and slender for sipping nectar.
-

Section B: True or False

Write *True* or *False* next to each statement:

1. Herbivores eat meat and plants. _____
 2. Snakes have venom to help them paralyze their prey. _____
 3. Eagles use their sharp claws and beaks to catch fish. _____
 4. Ants have sticky tongues to catch insects. _____
 5. Omnivores, such as bears, can eat a wide variety of foods. _____
-

Section C: Multiple Choice Questions

1. What feature allows chameleons to catch their prey?
 - a) Strong claws
 - b) Sticky tongue
 - c) Sharp teeth
 - d) Long legs
2. Why do elephants have long trunks?
 - a) To drink water and grab food
 - b) To climb trees
 - c) To fight predators
 - d) To breathe underwater
3. Which type of teeth are most common in carnivores?
 - a) Flat teeth
 - b) Grinding teeth
 - c) Sharp and pointed teeth
 - d) None of the above

4. Which animal uses its tongue to gather food from anthills?
 - a) Penguin
 - b) Anteater
 - c) Rabbit
 - d) Camel
 5. Animals that feed only on plants are called:
 - a) Carnivores
 - b) Herbivores
 - c) Omnivores
 - d) Scavengers
-

Section D: Match the Animals to Their Feeding Adaptations

Match each animal to its adaptation for feeding:

1. **Crocodile**

 2. **Butterfly**

 3. **Antelope**

 4. **Snake**

 5. **Hawk**

-

Section E: Short Answer Questions

1. Explain how a woodpecker's beak is suited for its feeding habits.
 2. Describe how snakes eat prey that is larger than their own head.
 3. How do omnivores adapt to their environment when food is scarce?
 4. What adaptations make herbivores well-suited to eat plants?
 5. Why do some animals, like frogs, depend on quick movements to catch their food?
-

Section F: Critical Thinking

Some animals, like polar bears, have specialized adaptations to survive in extreme environments. Think of an animal living in the desert and describe its feeding adaptations. Write three sentences about how it finds and eats food.

Instructions:

- Take your time and think about the different types of feeding adaptations.
- Use complete sentences for your answers.
- Share your creative ideas in the critical thinking section!
