

Grade 4 Math Worksheet: Subtraction (Difficulty Level: Advanced)

Name: _____

Date: _____

Part 1: Subtracting Large Numbers

1. $841,348 - 267,769 =$ _____
 2. $153,876 - 19,432 =$ _____
 3. $724,609 - 77,325 =$ _____
 4. $576,907 - 493,586 =$ _____
 5. $673,452 - 197,687 =$ _____
 6. $972,845 - 279,619 =$ _____
 7. $555,642 - 26,478 =$ _____
 8. $889,903 - 478,517 =$ _____
 9. $745,862 - 367,698 =$ _____
 10. $619,305 - 389,459 =$ _____
-

Part 2: Word Problems Set

Read the word problems carefully and solve them:

1. A factory produced 654,321 units of a product this year. Last year, it produced 789,012 units. How many fewer units were produced this year compared to last year?
2. A city's population was 987,654 last year. This year, due to migration, the population decreased to 678,901. What is the decrease in population?
3. A library had 876,543 books. After donating 345,678 books to another branch, how many books remain?
4. A company made 543,210 rupees in profit last year, but this year the profit was only 234,567 rupees. How much less profit did the company make this year?
5. A sports stadium had a total capacity of 789,012 people. During an event, 567,890 people attended. How many seats were left empty?
6. A farmer harvested 678,901 kilograms of wheat but sold 456,789 kilograms. How much wheat does the farmer still have?

7. A store initially had 987,654 items in its inventory. After a big sale, it now has 678,123 items. How many items were sold?
