

Grade 4 Science Worksheet 2: Water Cycle and Its Importance (Difficulty Level: Easy)

Name: _____

Date: _____

Question 1: What role does the sun play in the water cycle?

- a) It cools down the water.
 - b) It heats the water and causes evaporation.
 - c) It creates clouds.
 - d) It freezes the water.
-

Question 2: What happens to the water vapor after evaporation?

- a) It stays on the ground.
 - b) It rises into the air.
 - c) It freezes into ice.
 - d) It flows into rivers.
-

Question 3: What forms when water vapor condenses high in the sky?

- a) Ice
 - b) Clouds
 - c) Waterfalls
 - d) Rivers
-

Question 4: Why is evaporation important in the water cycle?

- a) It turns water into rain.
 - b) It helps form clouds by changing water into vapor.
 - c) It cools down the Earth.
 - d) It keeps water in lakes.
-

Question 5: What can speed up evaporation?

- a) Adding cold air
 - b) Adding heat or sunlight
 - c) Freezing the water
 - d) Covering the water
-

Bonus Question:

What happens to water droplets when they collect in the clouds and become heavy?

- a) They turn into steam.
- b) They freeze and form ice.
- c) They fall as rain.
- d) They stay in the sky forever.
