

Grade 4 Science Worksheet 3: Water Cycle and Its Importance (Difficulty Level: Easy)

Name: _____

Date: _____

Question 1: What is the water cycle?

- a) The way water flows in rivers
 - b) The movement of water through evaporation, condensation, and precipitation
 - c) The way water stays in lakes
 - d) The melting of ice into water
-

Question 2: Why is the water cycle important?

- a) It makes plants grow faster.
 - b) It moves water to different places on Earth.
 - c) It keeps animals cool.
 - d) It stops rivers from flooding.
-

Question 3: Which process in the water cycle returns water to the ground?

- a) Evaporation
 - b) Condensation
 - c) Precipitation
 - d) Melting
-

Question 4: How do clouds form in the water cycle?

- a) By water freezing in the air
 - b) By water vapor condensing into tiny droplets
 - c) By water boiling in the rivers
 - d) By ice melting in the sky
-

Question 5: What happens to water that falls to the ground as precipitation?

- a) It becomes water vapor.
 - b) It disappears.
 - c) It flows into rivers, lakes, or soaks into the ground.
 - d) It turns into steam.
-

Bonus Question:

What do we call water that falls to the ground as rain, snow, or hail?

- a) Evaporation
 - b) Condensation
 - c) Precipitation
 - d) Freezing
-
-
