

## Grade 4 Science Worksheet: Soil Pollution\_2

(DifficultyLevel:Easy)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

---

### 1. Fill in the blanks:

- One cause of soil pollution is throwing \_\_\_\_\_ and \_\_\_\_\_ on the ground.
- \_\_\_\_\_ can pollute the soil if too many chemicals are used in farming.
- Spilling \_\_\_\_\_ on the ground can make it hard for plants to grow.
- \_\_\_\_\_ waste from factories can make the soil dirty and harmful.

### 2. Short Answer Questions:

- What is one way that factories cause soil pollution?

\_\_\_\_\_

- What happens when chemicals from farming get into the soil?

\_\_\_\_\_

- How does throwing plastic on the ground affect the soil?

\_\_\_\_\_

- What happens to plants when the soil is polluted?

\_\_\_\_\_

### 3. Match the following:

Cause of Pollution	Example
1. Throwing Trash	a) Oil spill from an accident
2. Chemicals in Farming	b) Plastic bags left in a park
3. Oil Spills	c) Spraying pesticides on crops
4. Industrial Waste	d) A factory dumping chemicals

**4. True or False:**

- Soil pollution happens only from plastic waste. (True/False)
- Oil spills make the soil harder for plants to grow. (True/False)
- Chemicals in farming can help keep the soil healthy. (True/False)
