

Grade 4 Science Worksheet: Water Pollution_3
(DifficultyLevel: Easy)

Name: _____

Date: _____

1. Circle the Correct Answer:

a) Water pollution can harm:

- Only fish
- Only people
- Animals, plants, and people

b) Which of these is an example of water pollution?

- Littering on the ground
 - Pouring trash into the river
 - Picking up trash from the beach
-

2. Write a Paragraph:

How does water pollution affect animals in the water? Write 3-4 sentences explaining the harm caused by polluted water.

3. Fill in the Blanks:

Choose the correct word to complete the sentence.

(polluted, trash, fish, clean, oil)

a) ___ water is harmful to animals and plants.

b) We should never dump ___ or chemicals into rivers.

c) Fish living in ___ water might get sick or die.

4. Matching: Causes and Solutions

Match each cause of water pollution with a way we can solve it:

Cause of Pollution	Solution
A) Throwing plastic in the water	1) Recycle plastic items
B) Oil spills in oceans	2) Use less plastic and reuse items
C) Factory waste in rivers	3) Clean up oil spills safely
D) Chemicals in the water	4) Treat waste before releasing it

5. Drawing Activity:

Draw a picture of a clean lake, river, or ocean. Then, draw what pollution might look like in the water (trash, oil, etc.). Next, draw what can be done to clean it up.
