

SUBTRACTION

I Know

- Subtraction of one, two, three and four-digit numbers with and without regrouping.

Learning Goals

I will be able to:

- subtract five-digit and six-digit numbers with and without regrouping.
- solve real-life application problems involving subtraction.

Getting Ready

Rahul has ₹ 2500. He wants to buy a bag which costs ₹ 1500 and a pair of shoes which costs ₹ 1400.

Help Rahul to find out:

- How much money will be left with him after buying the bag? Is the money sufficient to buy a pair of shoes?

- To solve Rahul's problem, which mathematical operation did you use and why?

To find out the difference between the two numbers, we use subtraction.

Subtraction can be defined as the arithmetic operation for finding the difference between two numbers.

In subtraction the greater number is called the **minuend** and the number which is subtracted from the minuend is called the **subtrahend**. The result is the difference.

The sign for subtraction is '-'.
 $413 - 212 = 201$

Minuend	-	Subtrahend	=	Difference
↓		↓		↓
413		212		201

You have learnt subtraction of numbers, lets quickly revise.

Example 1

Reema has 543 stamps in her collection. She gave 215 stamps to her younger brother as he also wanted to collect stamps. How many stamps are left with Reema?

Number of stamps Reema has = 543

Number of stamps given to her brother = 215

H	T	O

Properties of Subtraction

If 0 is subtracted from a number, the difference is the number itself.

Example $5642 - 0 = 5642$

If a number is subtracted from itself, the difference will be zero.

Example $7482 - 7482 = 0$

If one is subtracted from a number, it gives the predecessor of the number as the difference.

Example $4531 - 1 = 4530$

Subtraction of 5-Digit and 6-Digit Numbers With Regrouping

Example 1 Subtract 54,269 from 98,368.

Step 1: Arrange the numbers in columns according to their place value.

	TTh	Th	H	T	O
	9	8	3	6	8
-	5	4	2	6	9
<hr/>					

Step 2: Subtract ones.

$8 < 9$, So 9 cannot be subtracted from 8.
 Borrow 1 ten from 6 tens and regroup.
 1 ten = 10 ones
 10 ones + 8 ones = 18 ones
 Thus, 18 ones - 9 ones = 9 ones..

Step 3: Subtract tens.

$5 < 6$, so 6 cannot be subtracted from 5.
 Borrow 1 hundred from 3 hundred and regroup.
 1 hundred = 10 tens
 10 tens + 5 tens = 15 tens
 Thus, 15 tens - 6 tens = 9 tens.

Finding Missing Numbers

When minuend is missing:

To find missing minuend, the difference is added to the subtrahend.

Example Find minuend for the following:

	TTh	Th	H	T	O	
						← Minuend
-	5	4	1	2	1	← Subtrahend
	3	2	1	2	3	← Difference

Solution: Add 54121 and 32123.

	TTh	Th	H	T	O
	5	4	1	2	1
+	3	2	1	2	3
	8	6	2	4	4

The minuend is 86244.

When the Subtrahend is Missing

To find missing subtrahend, the difference is subtracted from the minuend.

Example Find subtrahend for the following.

	TTh	Th	H	T	O	
	4	4	1	3	6	← Minuend
-						← Subtrahend
	1	5	6	2	4	← Difference

Solution: Subtract 15,624 from 44,136

	TTh	Th	H	T	O
	4	4	1	3	6
-	1	5	6	2	4
	2	8	5	1	2

The subtrahend is 28512.

Word Problems on Subtraction

Example 1 During a flower show, a doll was made using 23,942 white roses and 12,383 red roses. How many more white roses were used than red roses?

Solution:

Number of white roses used = 23,942

Number of red roses used = 12,383

Number of more white roses used than red roses = number of white roses - number of red roses
 $= 23,942 - 12,383$

	TTh	Th	H	T	O
	2	3	9	4	2
-	1	2	3	8	3
	1	1	5	5	9

Answer: 11559 more white roses were used to make the doll.

Example 2 Kaushik has ₹ 9,83,997. He bought a bike worth ₹ 2,24,564 and a laptop worth ₹ 1,24,332. How much money is he left with?

Solution: Money Kaushik has = ₹ 9,83,997

Cost of the bike = ₹ 2,24,564

Cost of the laptop = ₹ 1,24,332

	L	TTh	Th	H	T	O
	2	2	4	5	6	4
+	1	2	4	3	3	2
	3	4	8	8	9	6

Total amount spent on bike and laptop = ₹ 2,24,564 + ₹ 1,24,332 = 3,48,896

Money he is left with = ₹ 9,83,997 - the total amount spent on bike and laptop
= ₹ 9,83,997 - ₹ 3,48,896 = ₹ 6,35,101

	L	TTh	Th	H	T	O
	9	8	3	9	9	7
-	3	4	8	8	9	6
	6	3	5	1	0	1

- The greater number from which another number is to be subtracted is called a minuend.
- The smaller number that is subtracted from the other number is called a subtrahend.
- If 0 is subtracted from a number, the difference is the number itself.
- If one is subtracted from a number, it gives the predecessor of the number as the difference.
