Grade 4 Math: Bar Graph Practice Worksheet : Difficulty Level : Easy
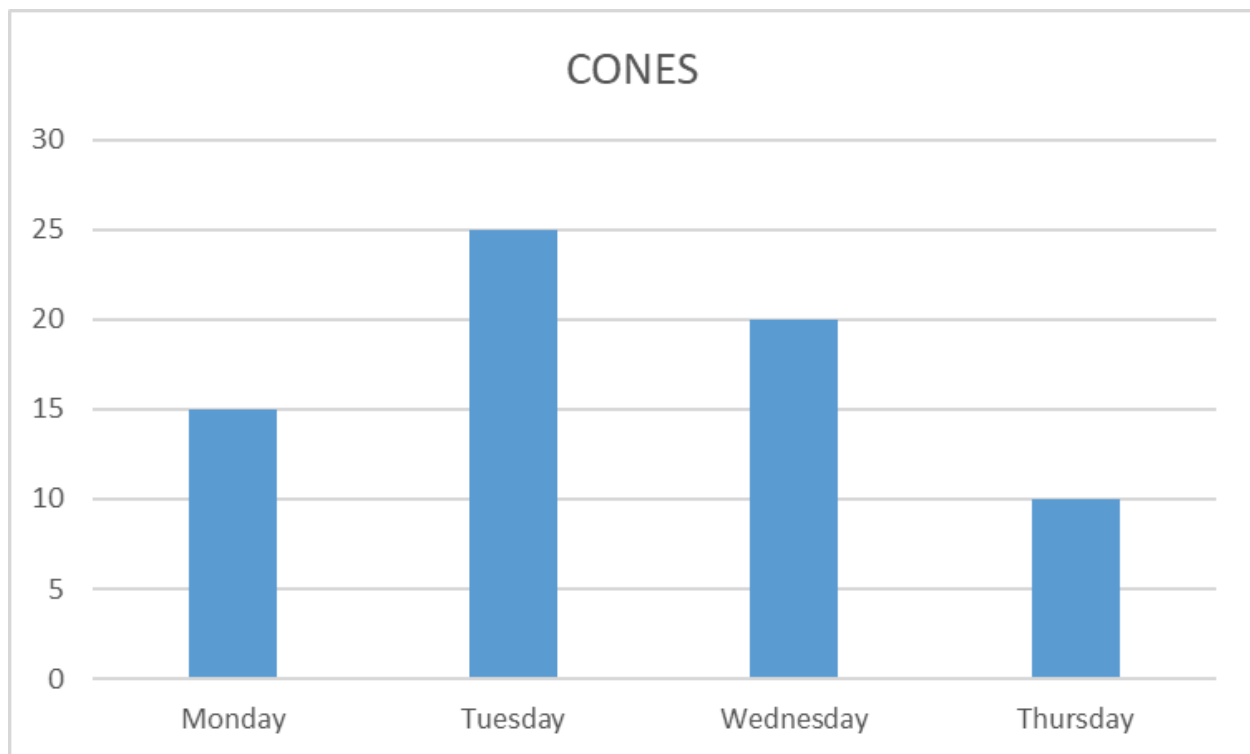

Name: _____

Date: _____

Part A: Reading a Bar Graph

1. Look at the bar graph below and answer the questions.

The bar graph shows the number of ice cream cones sold at an ice cream shop over four days.

Data:

- **Monday**: 15 cones
- **Tuesday**: 25 cones
- **Wednesday**: 20 cones

- **Thursday**: 10 cones

Questions: a) How many ice cream cones were sold on Monday?
b) Which day had the most ice cream cones sold?
c) How many cones were sold on Thursday?
d) What is the total number of cones sold from Monday to Thursday?

Part B: Drawing Your Own Bar Graph

2. Use the data below to draw a bar graph showing the number of pencils different students have.

Student Name	Number of Pencils
Ava	14
Jack	10
Olivia	8
Liam	16

Instructions:

- Label the x-axis as **Student Names** and the y-axis as **Number of Pencils**.
- Draw bars to represent the number of pencils each student has.

Part C: Answering Questions Based on Your Bar Graph

3. Use your bar graph to answer the following questions.

a) How many pencils does Ava have?
b) Who has the fewest pencils?
c) What is the difference in the number of pencils between Liam and Olivia?
d) How many pencils do Jack and Ava have in total?

Teacher's Note:

- **Objective**: This worksheet is designed to help students read, interpret, and create simple bar graphs.
- **Tip**: Encourage students to use a ruler and label their graphs clearly
