

Grade 5 Math Worksheet: Addition and Subtraction (Difficulty Level: Advanced)

Name: _____

Date: _____

Multi-step Logical Problems

1. A theme park welcomed **567321** visitors. **234126** had pre-booked tickets and **98765** bought tickets at the gate. How many entered without a ticket?
2. A football club produced **432567** jerseys. **123890** were sold online and **98765** were sold in stores. How many are left in inventory?
3. A textile company manufactured **623876** meters of cloth. **235780** were sold in one city and **324354** were exported. How many meters of cloth remain?
4. A shipping company transported **976890** parcels. **412567** were delivered and **325432** were returned. How many are still in transit?
5. A dairy farm produced **546321** liters of milk. **246780** liters were sold and **98432** liters were turned into cheese. How much milk is left?

Find the Error

1. A business calculated $567432 + 212345 = 779777$. Is this correct? Fix any mistake.
2. A shopping mall subtracted $321678 - 156432$ but got **166342**. Verify the subtraction.
3. A factory added $712345 + 389654 = 1111999$. Is this accurate?
4. A train station calculated revenue as $876543 - 543678$ but recorded **332865**. Find the mistake.
5. A tech firm subtracted $654321 - 298765$ and got **355556**. Check the calculation.

Logical Thinking Problems

1. A bus service planned **150000** trips. **75432** were completed and **23567** were canceled. How many trips are still scheduled?
 2. A science lab received **149678** test tubes. **45678** were used in experiments and **23987** were broken. How many remain?
 3. A power plant generated **987654** units of electricity. **312345** were supplied to city A and **298765** were sent to city B. How many units are left?
 4. A publishing house printed **623496** books. **198865** were distributed to libraries and **98432** were sold. How many are in stock?
 5. A zoo had **230561** visitors. **123432** left before lunch and **56419** left in the evening. How many were still there?
