

Grade 5 Math Worksheet: Addition and Subtraction (Difficulty Level: Intermediate)

Name: _____

Date: _____

Missing Number Problems

1. $41678 + \underline{\quad\quad\quad} = 90542$
2. $\underline{\quad\quad\quad} - 37652 = 53128$
3. $18574 + \underline{\quad\quad\quad} = 83412$
4. $94381 - \underline{\quad\quad\quad} = 56721$
5. $\underline{\quad\quad\quad} + 35974 = 91635$

Mixed Operations

1. $48752 + 31698 - 16324 = ?$
2. $89542 - 41876 + 22759 = ?$
3. $76381 + 29467 - 31204 = ?$
4. $54912 - 22784 + 17678 = ?$
5. $97362 + 50718 - 78234 = ?$

Multi-step Word Problems

1. A bookstore received 318562 books. They shipped 125321 to stores and kept 75412 in storage. How many books were sent to libraries?
2. A bakery baked 158374 cupcakes. 68235 were sold and 41876 were given away. How many remain?
3. A farm produced 426573 liters of milk. 195742 liters were packaged and 85624 liters were made into cheese. How much milk is left?
4. A textile mill manufactured 573821 meters of fabric. 315876 were sold and 122435 were damaged. How many meters remain?

5. A railway station recorded 887324 passengers in a month. 315678 left for domestic travel and 298124 left for international travel. How many are still waiting?

Bonus Questions

1. A museum collected Rs. 539218 in ticket sales. They spent Rs. 231457 on maintenance and Rs. 121876 on staff salaries. How much profit did they make?
 2. A courier company processed 713465 parcels. 342198 were delivered and 210357 were lost. How many are left?
 3. A stadium had 75412 seats. 45381 were sold for a match and 18729 were reserved. How many remain unsold?
 4. A farm harvested 645217 kg of corn. 294186 kg was sent to mills and 122345 kg was stored. How much remains?
 5. A school received 318765 new textbooks. 142875 were distributed and 97651 were lost. How many are left?
