 - a) Webbed feet
 - b) Long beaks
 - c) Sharp claws
-

Section 2: Label the Diagram

Below is a diagram of a camel. Label the following parts that help it survive in the desert:

- Hump
- Long eyelashes
- Wide feet
- Nostrils

Section 3: Short Answer Questions

1. Why do some animals hibernate during winter?

2. How do cacti survive in deserts with very little water?

3. Name one bird that migrates and explain why it migrates.

Section 4: Match the Adaptation to the Environment

Draw a line to match the adaptation with the environment it belongs to.

1. Thick fur and small ears
2. Long roots to find water
3. Light body for flight
4. Sharp claws for climbing trees
5. Slippery skin to stay moist

Environments:

- Forest
- Arctic
- Desert
- Rainforest
- Sky

Section 5: Creative Challenge

Imagine you are designing an animal that can survive in the rainforest. Describe two adaptations it would need to live there:

1. _____
2. _____
