

Grade 4 Math Worksheet: Indian and International Systems of Numeration (Difficulty Level: Intermediate)

Name: _____

Date: _____

Convert Between Indian and International Systems

1. Convert **Seventy million** into the Indian System.
2. Convert **Eighteen crore seventy-five lakh** into the International System.
3. Convert **19,235,789** into the Indian System.
4. Convert **6,12,43,700** into the International System.
5. Convert **Eighty-five million six hundred thousand** into the Indian System.

Write in Expanded Form

6. Expand **9,87,62,341** in both systems.
7. Expand **60,741,239** in both systems.
8. Write **7,14,25,890** in expanded form in both systems.
9. Express **39,215,860** in expanded form using both systems.
10. Write **4,82,37,501** in expanded form in both systems.

Compare and Order Numbers

11. Compare: **5,12,43,789** _____ **51,243,789**
12. Compare: **70,42,90,508** _____ **704,293,508**
13. Arrange in **ascending order**: **8,91,34,105** | **89,134,205** | **891,342,050** | **8.91 crore**
14. Arrange in **descending order**: **6,20,00,000** | **62,500,000** | **62.5 crore** | **62.5 lakh**
15. Arrange in **ascending order**: **30,41,57,689** | **34,157,689** | **331,576,890** | **3.41 crore**

Solve and Write in Words

16. Solve: **15 million + 5 million** in both systems.
 17. Solve: **9 crore – 70 lakh** in both systems.
 18. Convert **Rs. 4,28,79,000** to the International System and write in words.
 19. Convert **275 million** to the Indian System and write in words.
 20. Convert **Rs. 15.2 crore** to the International System and write in words.
