

Grade 4: Bar Graph Practice Worksheet: Difficulty Level: Intermediate

Name: _____

Date: _____

1. The bar graph below shows the number of students who attended different after-school clubs.

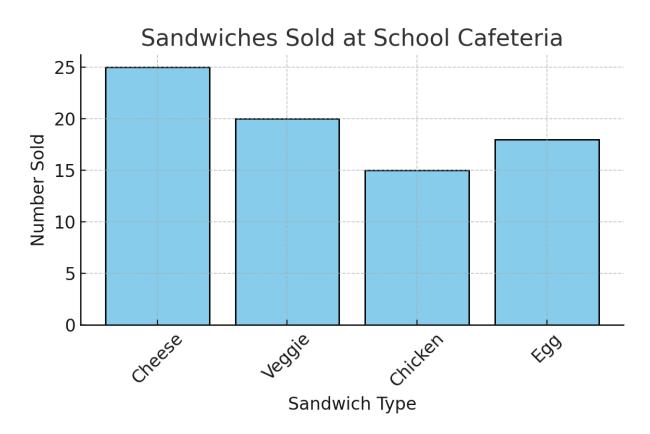

Questions:

- a) Which club has the most students?
- b) How many students are in the Science Club?

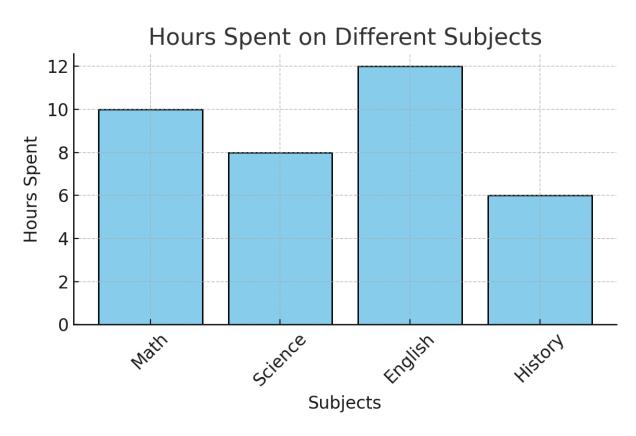

2. The bar graph below represents the number of sandwiches sold at a school cafeteria.

Questions:

- a) How many more cheese sandwiches were sold than chicken sandwiches?
- b) Find the total number of sandwiches sold for veggie and egg sandwiches.
- **3.** The bar graph below shows the number of hours students spent on different subjects.

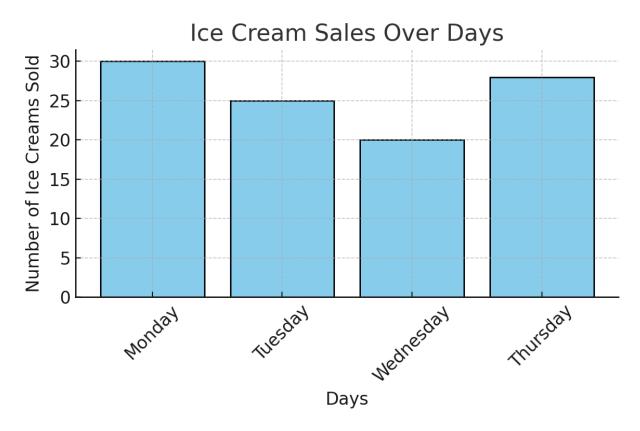

Questions:

- a) If 2 more hours are added to Science, which two subjects will have the same number of hours?
- b) Which two subjects together have exactly 18 hours?
- **4.** The bar graph below shows the number of ice creams sold in a shop on different days.

Questions:

- a) If each ice cream costs Rs. 15, how much money was earned from the ice creams sold on Monday?
- b) If 10 more ice creams are sold on Wednesday, how many ice creams will be sold in total on that day?
