Class 10 Mathematics – Pair of Linear Equations Worksheet (Advanced 4)

Name: _____

Date: _____

1. Solve and verify: $7x-15y=2$ and $x+2y=3$
2. Check whether rails represented by equations cross each other.
3. Explain why no solution arises in inconsistent pairs.
4. Find graphical interpretation of dependent equations.
5. Draw intersecting, coincident and parallel lines.
6. Write short notes on methods of solving pair of linear equations.
