

# Class 10 Mathematics - Probability

Name: \_\_\_\_\_

Date: \_\_\_\_\_

## Easy Worksheet 1

### Questions

1. What is probability?
2. What is a random experiment?
3. What is an event?
4. What is an elementary event?
5. What is meant by equally likely outcomes?
6. Name the two possible outcomes when a coin is tossed once.

### Answer Key

1. Probability is the measure of the chance of occurrence of an event.
2. An experiment whose outcome cannot be predicted with certainty is called a random experiment.
3. An event is a collection of outcomes of an experiment.
4. An event having only one outcome is called an elementary event.
5. Outcomes that have the same chance of occurring are called equally likely outcomes.
6. Head (H) and Tail (T).
