Class 10 Mathematics – Pair of Linear Equations Worksheet (Medium 2)

Name: _____

Date: _____

1. Determine consistency using ratios: $3x+2y=5$ and $2x-3y=7$
2. Determine consistency: $2x-3y=8$ and $4x-6y=9$
3. Determine consistency: $5x-3y=11$ and $-10x+6y=-22$
4. Explain graphical meaning of coincident lines.
5. Explain graphical meaning of parallel lines.
6. Explain graphical meaning of intersecting lines.
